ODISCOM

Site acquisition. Engineering. Construction.

League City, Texas | www.odiscom.com

COMPANY CAPABILITIES

The services behind your next network build.

Odiscom supports operators, engineering firms, infrastructure owners and prime contractors with defined technical scopes, recurring engineering production and construction delivery. A&E and construction services are provided by separate Odiscom companies.

SCOPE YOUR PROJECT

Fiber & OSP engineering

FTTH mainline and drops; aerial and underground route plans; fielding, CAD/GIS, quantities and construction drawings.

Joint use & make ready

Pole data, loading and clearance reviews, make-ready documentation, OTMR and utility application packages.

Wireless & structural engineering

Wireless A&E, new sites and upgrades; tower, mount and foundation engineering; construction details.

Permitting & program services

ROW and agency packages, specialist coordination, reviewer responses, QA/QC and recurring production support.

Site acquisition & due diligence

Candidate searches, owner and broker outreach, negotiation support, property constraints and entitlement coordination.

Fiber facilities

ILA, hut, POP and cabinet site development; equipment layouts, foundations, access and utility interfaces.

Civil & electrical engineering

Grading, drainage, erosion control, power, grounding and generator coordination; multidisciplinary drawing sets.

Construction & closeout

Construction scopes through Odiscom Construction; engineering RFIs, field revisions, redlines and record drawings.

SELECTED A&E EXPERIENCE

TDS: fiber drawings and joint use | Zayo: ILA facilities and site acquisition
Horrocks: multiphase fiber drawings | Stratis: underground fiber permit plans
SQUAN: PE review and OTMR | D4 Communications: fiber-hut site engineering

Odiscom LLC - A&E

Established 2015 | 51% woman-owned
Texas Engineering Firm F-23951
Engineering lead: Jacob Goralski, P.E.

Odiscom Construction LLC

Separate construction company
Telecom, civil and utility infrastructure
